EXPERIENCE

Front-End Developer — Arridev Studio   **Facebook Link** ‖ (Present)
Project Basis | July 2024 – Present
- Worked on multiple client projects as a front-end developer.
- Designed and implemented responsive UI components using ReactJS and Tailwind CSS.
- Created English explanation videos for clients' projects.
- Collaborated with team members to deliver high-quality front-end solutions.
- 1 year of experience working with real-time APIs and production-level code.

Project

Firsttrip - ReactJS   **Live side** ‖ **Client side**
Travel Tour Website - Mern Stack project
This is my client project with team members and this project uses a real time API. Establish dedicated teams for effective collaboration.
Technologies : ReactJS | Javascript | Tailwind CSS | RESTful API | Redux | Postman.

ISTIQBAL - NextJS   **Live side** ‖ **Client side**
This is my practice project. This is where I designed the front end.Streamlined, responsive and user-friendly experience.
Technologies : ReactJS | Tailwind CSS | Framer Motion | Firebase

Createmate AI - ReactJS   **Live side** ‖ **Client side**
This is a client project of mine. I made this website fully responsive and successfully completed the work with the client. It has a domain. Check out its client side.
Technologies : ReactJS | Tailwind CSS | MongoDB | Animate.css | NodeJS | Axios |

ShanGrila - ReactJS   **Live side** ‖ **Client side**
In this project, I front end 10 pages and made them fully responsive. I designed it my own way after looking at the design of the themforest platform.Streamlined, responsive and user-friendly experience.
Technologies : ReactJS | Tailwind CSS | Framer Motion | Firebase
